

INVINITY GREEN HILL

This Project is simply is a place with a lot of solar panel on its roof to give the nice look of the roof style combine with the grass green and walkway that full of It has the shape of '8', the symbol of infinity. It is relevant with the theme of 'Renewable Energy'.

VISION

To make the site as a nice recreation place for family and sport activity and also education and exhibition in a land of energy plan.
To build the people's awareness of renewable energy and green city idea.
While the building its self is using Photovoltaic Solar Panels and Piezoelectric Generator as the true example of the renewable energy concept.

Energy Technologies:

- Photovoltaic Panels
- Piezoelectric Generator (Kinetic energy harvesting by pavegen system Ltd.), convert mechanical strain into electrical energy. attached in walkway and stairs.
