

ORIGIN

Introduction:

Our intelligence, foundations and paths are centered and nourished by history, backgrounds, roots and testimony. The fact is that the humanity is inspired with elements and experience from the past and that they are used to reinterpret and transform our present and future. The antecedents are crucial for the constant restoration, renovation and redesign of our society, of the human mind and the world we live. It is relevant to create a physical document and tangible conscience of the source from where some concept or phenomenon begins. The project ORIGIN is a precursor of the mentioned ideas and it is ordered in the way to syncretize and synchronize different retroactive features from human memories, examples and evidences, integrating new tendencies. It is a complex that tries to reinvent and renew, combining tradition with contemporary livings and understandings. Simple structures, multi functional characters with interactive purpose and relevant associative properties are the key points of ORIGIN proposal.

ORIGIN will represent an instrument that generates not only the energy power, but also it will awake a conscience with an important human influence and participation. It will be an outstanding monument, an impressive illustrative symbol of the city of Copenhagen and Denmark.
