TO G<sup>a</sup>ETHER

6 km traveled  
56 kcal spent  
65 Wh of energy produced

Today 2000 people on the site  
illuminate 225 public lamps of  
LED 30 W each

225 public lamps illuminate  
during 19 hours and 20 minutes

225 public lamps are spread  
over 310 m<sup>2</sup> in the city

Each participant provided himself with a bracelet at the entrance of the site. There is several options which allow people to know the energy they have produced. It can also realize that this energy could supply in terms of area in the city. The participant can then be aware of the costs of energy and sustainable development issues. This universe is for educational purposes.

The site communicates with the city and in particular the most actives areas through flash-codes, which referred to a smartphone application. This application, in addition to other options, tells you know in real time the status of the site and the amount of energy stored on site. Several major events occur on the site (nightclub, sporting events ...) to generate large amounts of energy.
