

BLÆSTHAVN

A ICON OF GLOBAL SUSTAINABILITY

LOCATION SITE:
REFSHALEØEN, COPENHAGEN, DENMARK

Between the veil of the sky and sea joins the land and where the waves arrive a new place, where life grows on arid soil and it will emanate color and energy is created. "Smooth sailing" as they say, and driven by the north wind, a strip of sky pigments makes a spectacle of colors that vibrate the skin and full of light the bulbs. Each step in BlæstHavn is a light, every movement is energy, let yourself be guided by a lighthouse, learn from it and make that your presence in it will generate shaped power in color.
