

**Site Plan** Site boundaries in red, blue circles indicate the locations of the wind turbines. They are placed in such a way so as to minimise loss. Wind statistics taken from Copenhagen airport 8.7km away, the red sectors indicate the wind not taken into calculations due to tower blockage and unit alignment.

**View from Mermaid** From the viewpoint at the little mermaid, it is possible to see how the project sits on site. The rhythm of the towers matching the industrial chimneys behind the site.

**Dealing with rain**
