

# THE SOUND OF DENMARK

\_is the sound of the wind

Construction phases / Energy production

\_First Phase  
7mts diameter = 15.708kWh  
15.708kWh x 4 turbines = 62.834kWh

\_Second Phase  
5mts diameter = 8.014kWh  
8.014kWh x 4 turbines = 32.056kWh  
62.834kWh + 32.056kWh = 94,890kWh

\_third Phase  
3.80mts diameter = 5.629kWh  
5.629kWh x 4 turbines = 22.516kWh  
94,890kWh + 22.516kWh = 117,406 kWh  
117,406 kWh x 4 trios = 469.624 kWh per year

The force of the wind has pushed the development of Denmark since immemorial times.  
In the past, wind strength boost the Vikings to colonize new lands, now in the present wind power provides renewable energy to Denmark.

The wind is the sound of Denmark since this natural force has always state rooted to the development of the country.

Then, how do Denmark sounds?

This is a space for reflection and to feel the sound of the natural force that drives Denmark.

It is a space for remembering the past and envisioning the future of this nation. This is a sound-landscape.
