

CREATE, EXPLORE & ENJOY!

Rør is a dynamic energy installation which can transform on demand. Each visit to the park will be a new experience, as people are free to roll and re-arrange the tubes to create new and unique spaces.

Create spaces to relax, socialise, and entertain. or overlap the tubes to create fun climbing areas.

Rør can hold large events such as music festivals by re-arranging the tubes to create mass seating. It can also be arranged to create private and intimate spaces for small gatherings.

Altogether, Rør will revitalise Refshaleen to create an enriching public environment that utilises an unique technology to generate clean energy.
