

GRAVITY GAME

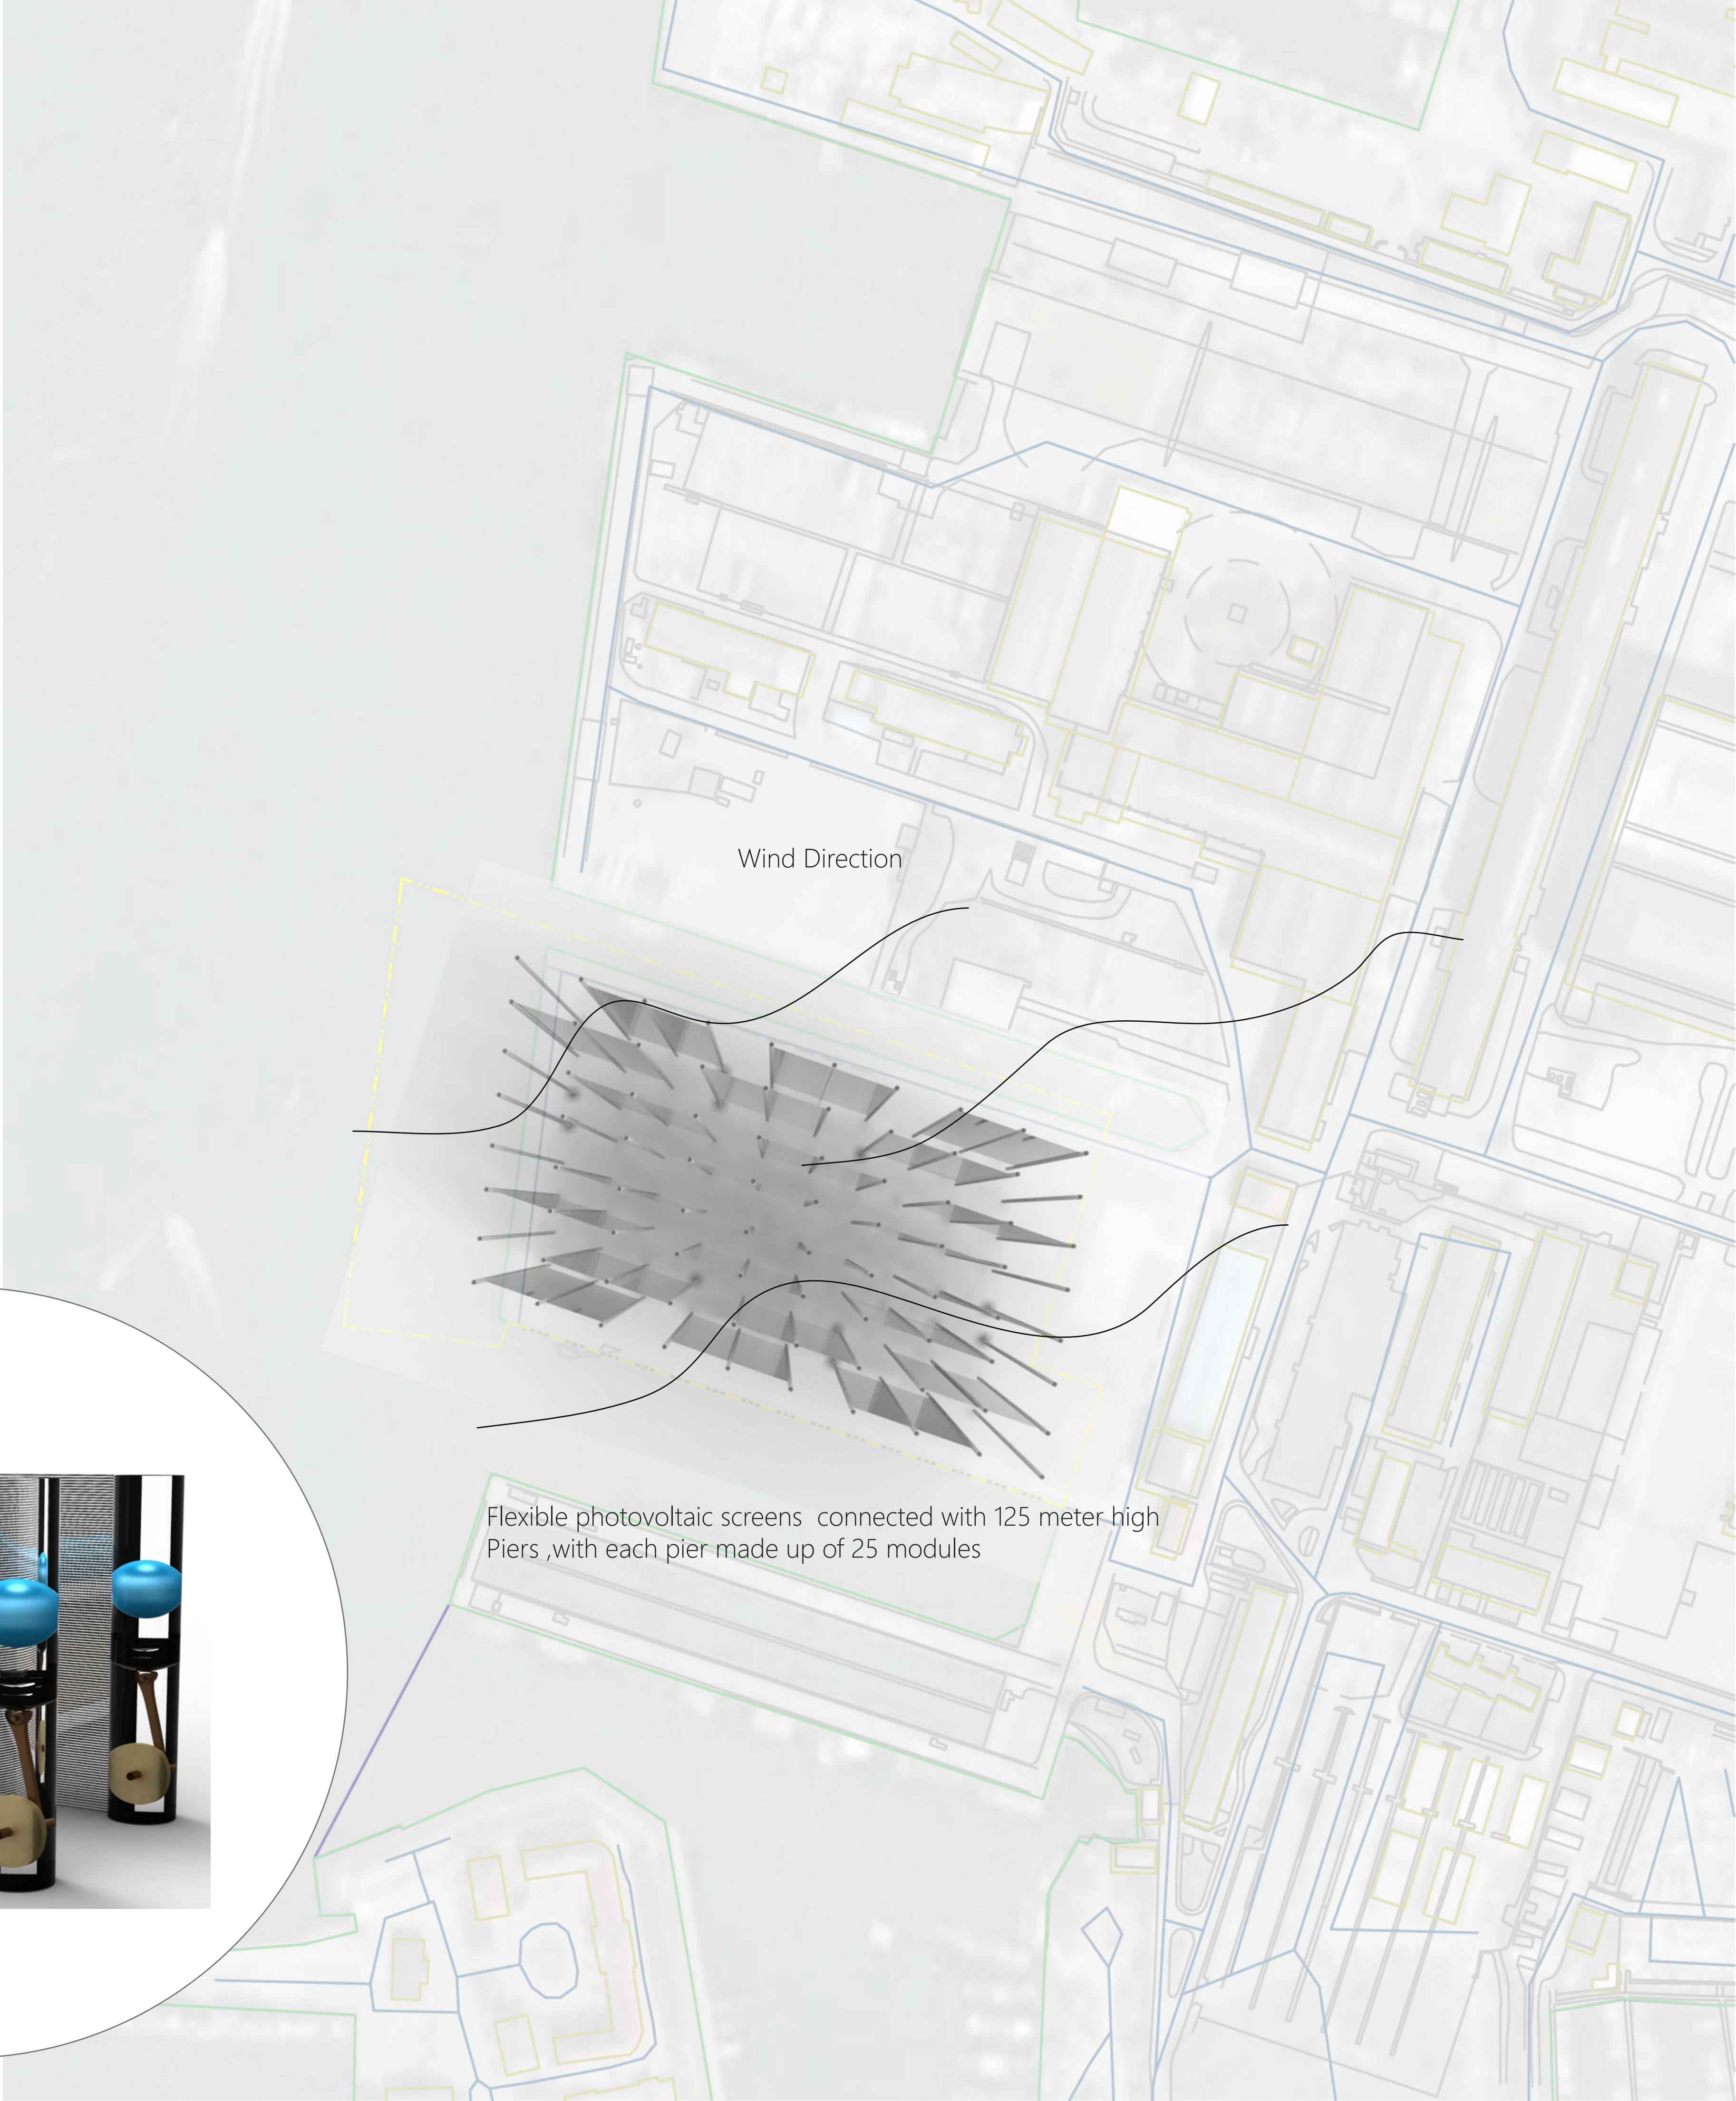

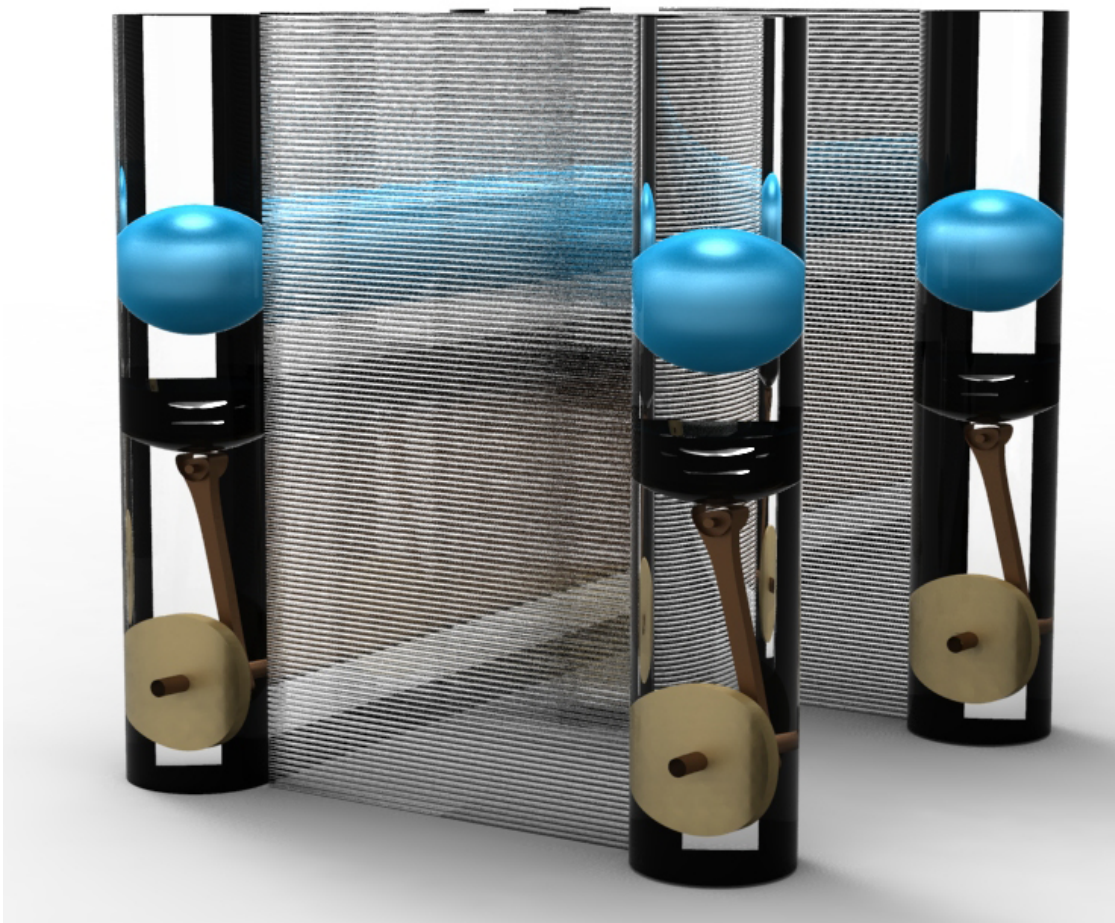

With the Colourful stones popping up and down within the transparent piers, the composing of a natural music emerges when the stone ball touches the compressed spring cylinder.

The falling of the rounded stones works with the principle of gravity, which is present round the clock, keeps on producing electricity.

Flexible screens dances to the music of the moving stones, kissing the wind and with the sunlight, The artistic environment keeps on generating energy.

Carbon nano tubes a strong material can be used in the manufacturing of the piers .

Each pier with 25 modules can produce 120 megawatt electricity. with 80 piers we can produce 9600 megawatt of electricity.

Flexible photovoltaic screens connected with 125 meter-high Piers ,with each pier made up of 25 modules
