

Fantastic Five Area

Energy x 5

FFA

1. Solar Energy.
2. Wind Energy.
3. Muscle Energy.
4. Algae Energy.
5. Water Energy.

Technology draft - no scale

Fantastic Five Area is an energy-generating installation of innovative modules. The topography makes the Refshaleøen perfectly suited to use the local renewable energy. But FFA is more than traditional powerplant. It is also green park friendly for visitors. The gigantic sculpture of Copenhagen Colossus is the new icon of innovative Denmark. What is more, Colossus ideally harmonizes with the figure of Mermaid. FFA has huge impact on prison system. Producing clean energy will become part of prisoners' rehabilitation due to Gym Powerplants. The most dutiful inmates can participate in energy-producing workout instead of welfare works. Algae energy collected from Bioreactors is really efficient and clean way of gathering fuel. Classic Water Turbine makes use of the water neighbourhood and generates energy from water drifts.
